

Quilter's Creative Touch

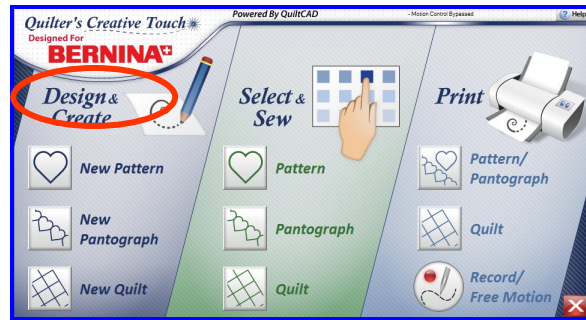

Design & Create– New Pattern

PatternCAD - Draw with Splines

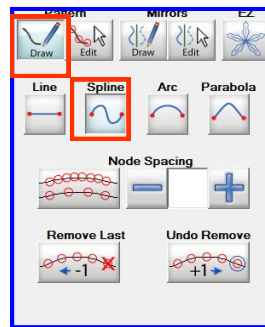

With just a few simple splines it's easy to draw.

Draw Leaf & Branch

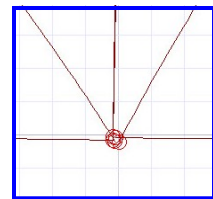

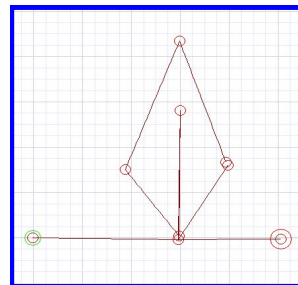

- From the **Main Menu**
- Touch **New Pattern** under the **Design & Create**

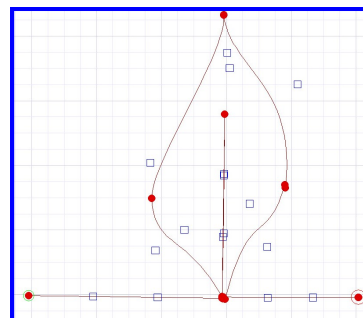

- Select **Pattern > Draw**
- Select **Spline**
- Select show **Nodes**

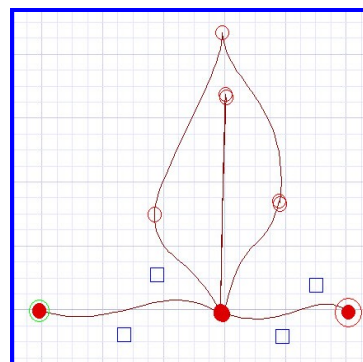

- Begin at the left and going to the right ,draw 8 splines
- Select **Edit >** drag nodes at base into 1 point

- **Select All >** using the square blue handles, drag in opposite directions to shape the leaf

- Select **Unselect All**
- Select the top of the leaf vein and drag toward tip of the leaf
- Select only the branch ends and drag the spline

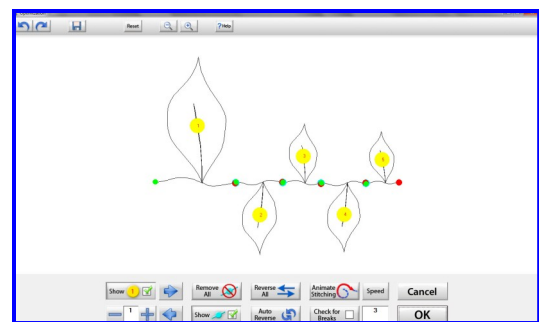

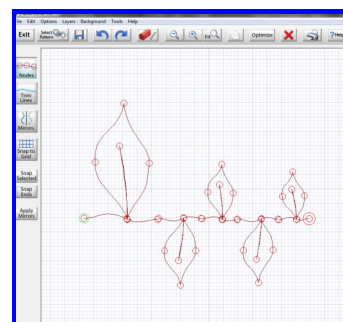

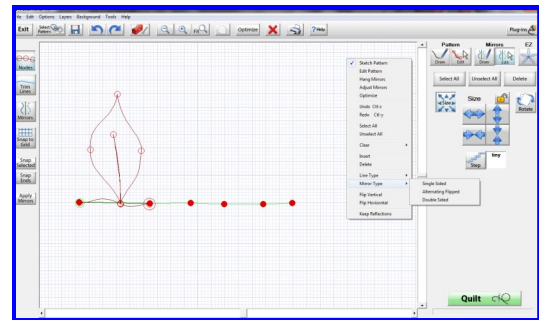

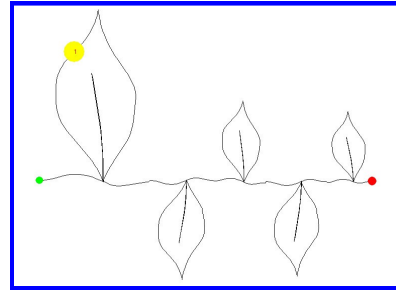

Quilter's Creative Touch

Create Leaf Vine

Replicate by Mirroring

- Select **Mirror > Draw**
- Select **Zoom** > scroll so that leaf is on the left side of the Pattern Grid
- Draw first mirror (Master Mirror), start at left end of the branch and end exactly on the right end of the branch. All mirrors will be copied from the Master Mirror. Continue to draw 4 more mirrors of varying lengths.
- Select **Mirror > Edit**
- Select the mirror nodes by drawing a bounding box to select.
- Right click in the pattern grid, from the drop down menu select **Mirror Type > Alternating Flipped**
- Select **Apply Mirrors** to duplicate leaf vine pattern

Optimize

- Select **Check for Breaks > Animate Stitching**
- Select **Remove All** to remove trim lines

Save

- Select **Save** > select **Patterns** folder > locate folder > name the new pattern > **Save**
- Select **OK**
- Select **Quilt**
- Place the Pattern for Sewing
