2152 - 1 spool
2704 - 1 spool
2732 - 1 spool
5210 - 1 spool

Fabric:
½ Yard of Pink fabric for Unicorn Head
¼ Yard of Green fabric for plaque and Horn
1 pack - Fiber Form Craft Interfacing Sheet (18"x22")

Final Height: Approx. 12"

EMBROIDERY

STEP 1

- Hoop two layers of AquaMesh stabilizer. Stitch Color 1, Fiber Form & Fabric Placement Stitch. Remove hoop from machine but do not remove project from hoop.
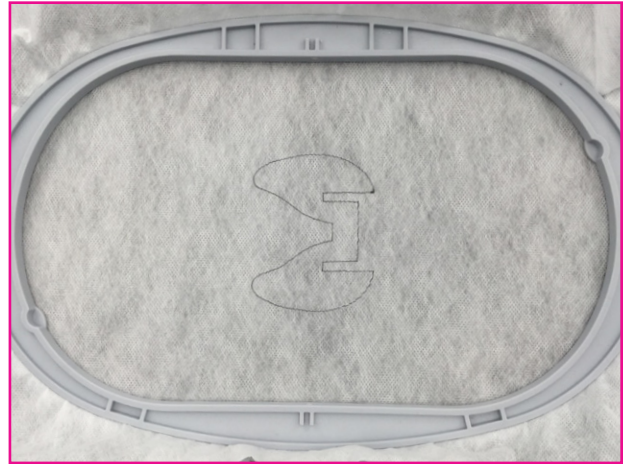

STEP 2

- Cut out a piece of Fiber Form appropriate to the design. (Fiber Form Patterns provided)
- Lightly spray one side of the Fiber Form with adhesive spray. Place the fiber form onto the stabilizer, covering the placement stitch completely.
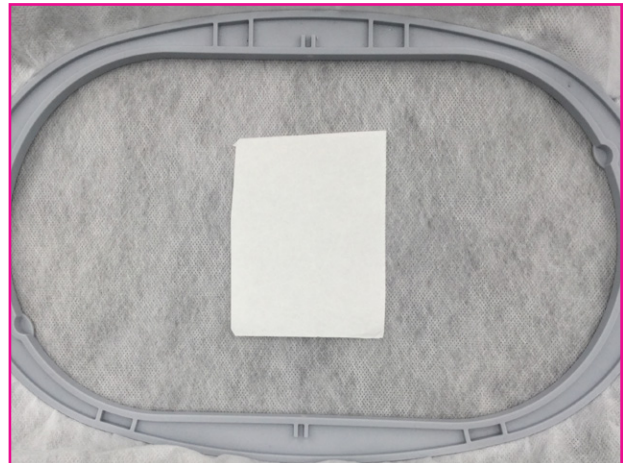

STEP 3

- Cut a piece of fabric appropriate to the design. Lightly spray. Place over Fiber Form and smooth out any wrinkles. (tip: use wash away tape or temporary spray to hold in place)
- Colored Fabrics are used on the good side as a topper to avoid bleed through of the Fiber Form in the fills.

STEP 4

- Return hoop to machine and stitch Color 2, Cut Line and Tackdown.
- Remove hoop from machine but do not remove project from hoop. Trim the fabric and Fiber Form (if fiber form pattern wasn't used) as close to the cut line as possible.

STEP 5

- Return hoop to machine and stitch the remaining color changes, matching the bobbin to the outer satin color.

STEP 6

- Rinse away the AquaMesh stabilizer and allow to dry.
- Repeat for all pieces that state *Fiber Form and Fabric required.
- *The Horn is with fabric with stabil stick backing only to allow for better shaping.

ASSEMBLY

STEP 1

- To assemble the plaque halves.
- Match the top thread and Bobbin thread to the color used on the plaques outer edge. Butt the two straight-edge sides of the plaque together right side facing down. Use Expert Embroidery Tape WashAway to hold the backs of the plaque together.

STEP 2

- Place plaque right side up and zig zag stitch together.

STEP 3

- With the plaque right side up. Place Face Side 1 in the down position, align the tab of Face Side 1 with the left placement guide on Plaque Side 1.
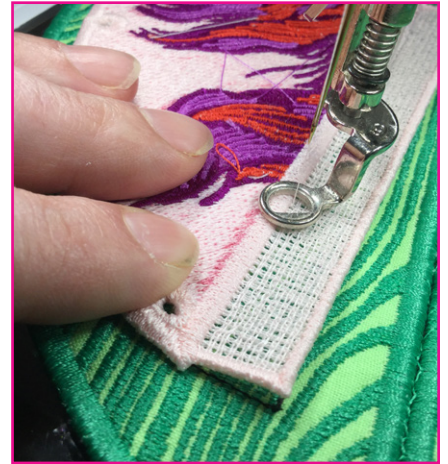

STEP 4

- Tack down just inside of the satin edge of the tab, keeping the tab aligned with the placement guide.

STEP 5

- Repeat for the Face Side 2.
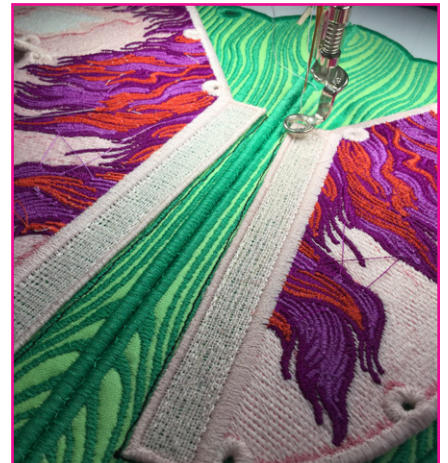

STEP 6

- Using alligator clamps, button the Neck Front to both Face Sides starting from the bottom working upwards to the jaw.
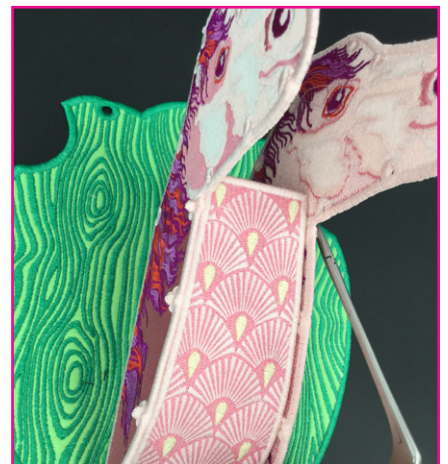

ASSEMBLY

STEP 7

- Button the bottom four buttonettes of the Neck Back to the Face Sides. Button only the bottom four, this leaves an opeing to secure the Ears later.
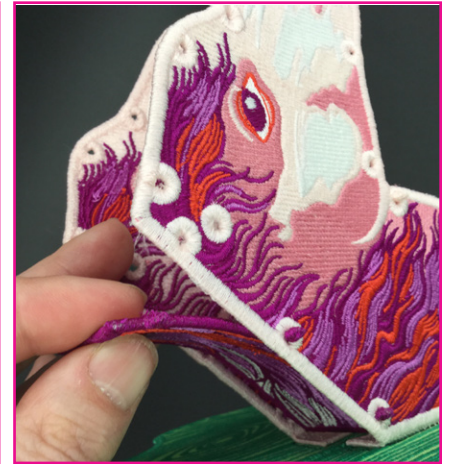

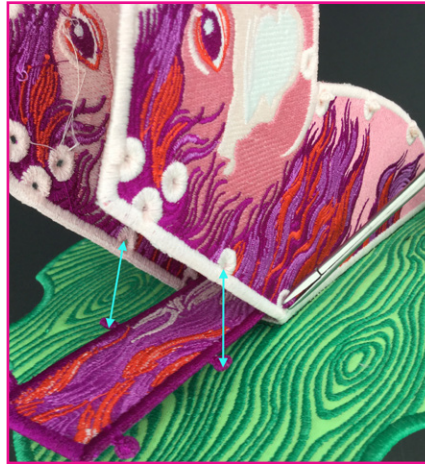

STEP 8

- Button the Face Front to the Face Sides, starting at the jaw working upwards and stopping at the eye. Leaving the last four unbuttoned to give an opening to secure the Horn and Ears.
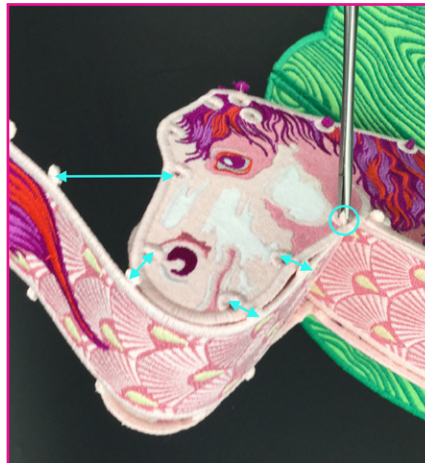

STEP 9

- Shape the Horn into a curve and button the four buttonettes to their corresponding eyelets.

13
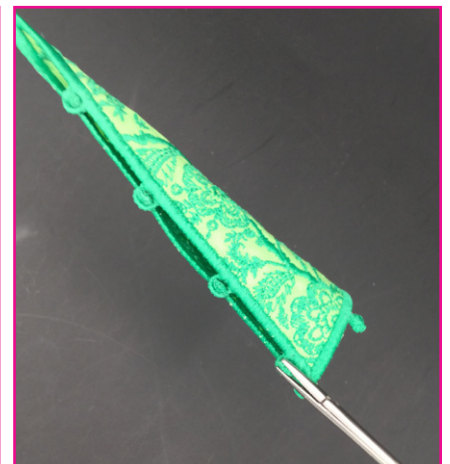

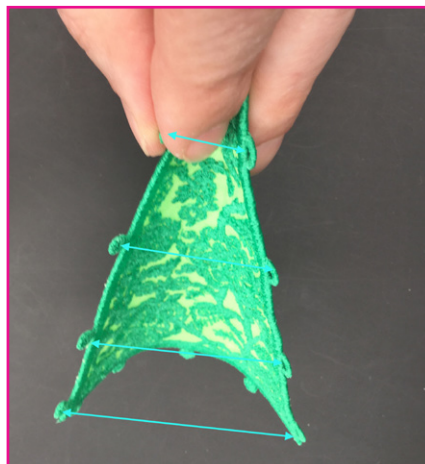

STEP 10

- Attach the Horn to the Face Front by pulling the four buttonettes through their corresponding eyelets.

STEP 11

- Slide the ears over the top point of the head and using alligator clamps button the two buttonettes to the lower eyelets.

STEP 12

- Button the last four buttonettes from the Face Front and the last two buttonettes from the Neck Back to their corresponding eyelets on the Face Sides.

TIP

- When head is assembled, shape the nose to fit the profile. Warm the nose piece slightly with steam or a hair dryer, then shape into place. Hold in place for a few seconds until the nose piece cools.
- You can use the same steps to shape the Horn.

ATTENTION

When printing this document, any page scaling or page fitting options in your print dialog box must be turned OFF or set to NONE so that your files will print out at their actual size. Images not printed at actual size will not function as intended.
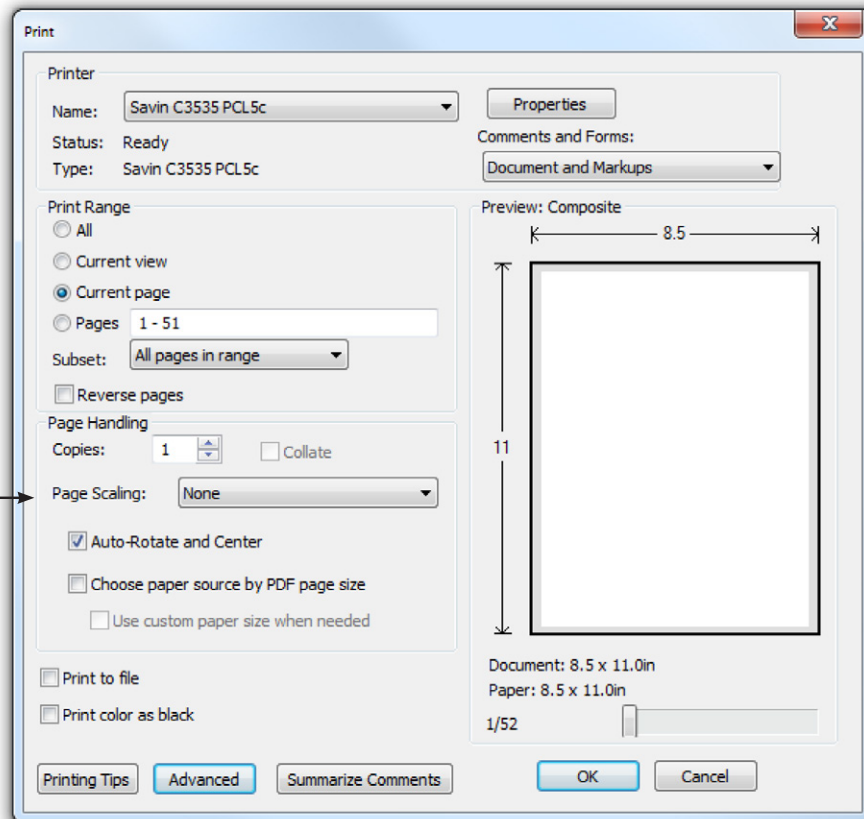

TO SAVE PAPER

Only print the desired image by navigating to the image's page, go to File > Print and select "Current page" in the print dialog box. Repeat for each desired image.

Tula Pink: The Quilting Collection Wall Quilt

The rainbow of colors in this beautiful fabric collection is a perfect backdrop for the new OESD design collection, Tula Pink: The Quilting Collection. Simple piecing and unique designs give a fresh, modern look to this colorful wall quilt.

Finished size: 40½" x 50½"

- **Fabrics:** Tula Pink's Designer Solids for Free Spirit Fabrics
- **Blocks:** One fat eighth (11" x 9") each of 18 different colors
- **Sashing and borders:** 1 ⅛ yard each of two different colors
- **Backing:** All Stars Tula Pink by Free Spirit, Pom Pom Agave, 50" x 60"
- **Binding:** All Stars Tula Pink by Free Spirit, Tent Strip Agave, ½ yard
- **Low-loft batting such as Warm & Natural:** 50" x 60"
- **Thread:** Isacord thread to coordinate with each color block and border, as well as a separate color to coordinate with backing

Cutting Instructions

Cut the following pieces as indicated below.

Blocks:
- Two 5½" squares of each color for a total of 36 squares

Sashing:
- Three strips of color 1, 30½" x 2½"
- Two strips of color 2, 30½" x 2½"

Side Borders:
- Two strips of color 1, 5½" x 21½"
- Two strips of color 2, 5½" x 19½"

Upper and Lower Borders:
- One strip of color 1, 5½" x 40½"
- One strip of color 2, 5½" x 40½"

Piecing

Note: All seam allowances are ¼". Using a quarter inch piecing foot will speed the piecing process while making the results more precise and accurate. **Photo 1**

Photo 1

Blocks and Sashing

1. Using diagram 1 as a guide, piece 6 rows of 6 blocks in the color sequences shown in the diagram. There will be 2 rows of 3 color sequences. Press the seams between the blocks open.
2. Arrange the rows in the color order shown in the diagram with the indicated colors of sashing between them. Note that Rows 4 - 6 are duplicates of Rows 1-3 but are placed in reverse order.
3. Stitch a strip of sashing to the lower edge Row 1; press the seam allowances down toward the sashing.
4. Stitch the upper edge of Row 2 to the lower edge of the sashing; press the seam allowances up toward the sashing.
5. Continue adding the rows of blocks with sashing between as indicated on the diagram until the center section of the quilt top is complete.

Side Borders

1. Stitch a strip of side border color 1 to a strip of side border color 2 along one 5½" end to make a border that is 40" long; press the seam open. Repeat with the remaining side border pieces to create an identical second border.
2. Align the seam of one border with the seam between Row 4 and Sashing 3. The shorter end (color 2) of the border should be toward the bottom so the color 2 borders will be stitched to the color 2 sashing pieces and the color 1 borders will be stitched to the color 1 sashing pieces. Attach the border by stitching from the seam to the upper edge and then from the seam to the lower edge. Press the seam allowances toward the border. Repeat with the opposite side border.

Upper and Lower Borders

1. Stitch the upper border (color 1) to the upper edge of the quilt top; press the seam allowances toward the border.
2. Stitch the lower border (color 2) to the lower edge of the quilt top; press the seam allowances toward the border.

Preparing the Quilt for Embroidery

1. Prepare the quilt top for embroidery by making a quilt sandwich. Place the backing wrong side up on a large flat surface such as a table, counter, or floor. Secure the backing and keep it flat by taping or clipping it in place.
2. Smooth the batting in place, centering it on top of the backing.
3. Fold the upper edge of the batting back to expose the back of the backing. Spray the folded-back portion of the batting with temporary adhesive. Unfold the batting, pressing it in place on the wrong side of the backing. Repeat with the lower part of the batting to adhere the entire piece of batting to the backing.
4. Spray the exposed side of the batting with temporary spray adhesive. Place the quilt top right side up on top of the batting, smoothing it in place to adhere it to the batting. Note: The backing/batting should extend several inches beyond the quilt top on all edges to facilitate hooping when stitching the borders.
5. If desired, the quilt can also be pin-basted using rust-proof safety pins to hold the layers together. Pin through all three layers in a vertical line down the center and a horizontal line across the center of the quilt. Add pins about 3"- 4" apart over the rest of the quilt. Remove pins as needed each time the quilt is hooped for stitching.

Hooping

1. Before starting to stitch, plan how you will hoop the blocks, using your largest hoop to minimize the number of hoopings needed. Hoop multiple blocks if possible, making sure that all four edges of each block are inside the stitching area. The designs will fill each block completely.
2. Starting at the center of the quilt and working toward the outer edge, hoop an area to prepare for stitching.
3. Loosen the closure of the hoop as much as possible to allow the layers of the quilt to be hooped. The batting will act as stabilizer and no additional stabilizer is needed.
4. Lay the quilt over the outer ring of the hoop. Insert the inner ring into the outer ring and press into place. If the inner ring will not go in, loosen the closure of the hoop even more. The quilt should fit snugly in the hoop but should not be forced the quilt into the hoop. Once the inner hoop is in place, tighten the closure.

Preparing the Machine for Quilting

1. Thread the machine with Isacord thread in the top to coordinate with the block to be embroidered.
2. Wind a bobbin to coordinate with the quilt backing.
3. For each block or border piece, change the thread color to coordinate with the block or border.
4. Insert a quilting needle.

Block Embroidery

1. Refer to the Diagram 2 and stitch the indicated designs in the blocks of the quilt. Each design should be stitched in the center of a block.
2. Print the Block Design Template to use as an easy way to position the design exactly in the center of the block. Cut out the template and punch a small hole in the center where the diagonal lines intersect. **Photo 2**
3. Position the template on the block, aligning the edges with the seams of the block. Mark the center of the block using a fabric marker in the punched hole. Remove the template.
4. Open the design indicated on the diagram. Rotate the design if needed.
5. Align the center of the design with the marked center on the block; stitch the design.
6. Repeat for all 36 blocks of the quilt, using the Isacord thread color for each block.

Photo 2
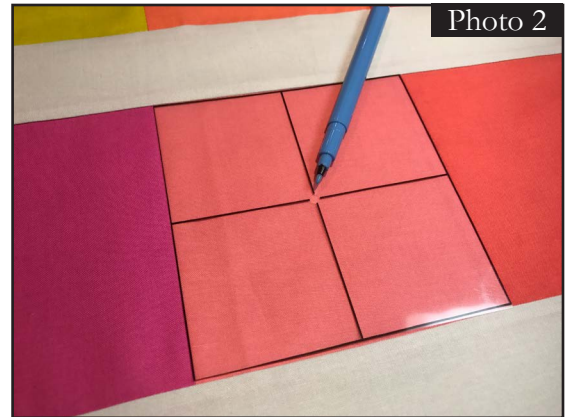

Sashing Embroidery

1. Print the template that is included with the design collection for design #80168-20. Make four copies (for a total of five templates) and cut out the templates, trimming close to the lines of the motif.
2. Arrange the five templates in a continuous line on the sashing below Row 1 of the blocks. **Photo 3**
3. Using a fabric marker, mark the center of each design. Hoop the sashing and align the center of the design with the marked center on the fabric.
4. Stitch the five designs, rehooping as needed.
5. Repeat for the sashing strips under Rows 2 and 3.
6. Following the directions above, stitch design #80168-21 below Rows 4 and 5.

Photo 3
Preparing for Border Embroidery

1. Baste the quilt top to the batting and backing along all edges.
2. When hooping borders, the top edge of the quilt may not extend all the way to the edge of the hoop, but the batting and backing should be hooped. The basting will help to hold the quilt top in place during embroidery.

Side Border Embroidery

1. Print the template that is included with the design collection for design #80168-22. Make three copies of the template (for a total of four templates) and cut them out, trimming close to the lines of the motif.
2. Arrange the four templates in a continuous line on the left-side border using the diagram as a guide.
3. Using a fabric marker, mark the center of each design. Hoop the border and align the center of the design with the marked center on the fabric.
4. Stitch the four designs, rehooping as needed.
5. Repeat for the right-side border, stitching 5 of design #80168-23.
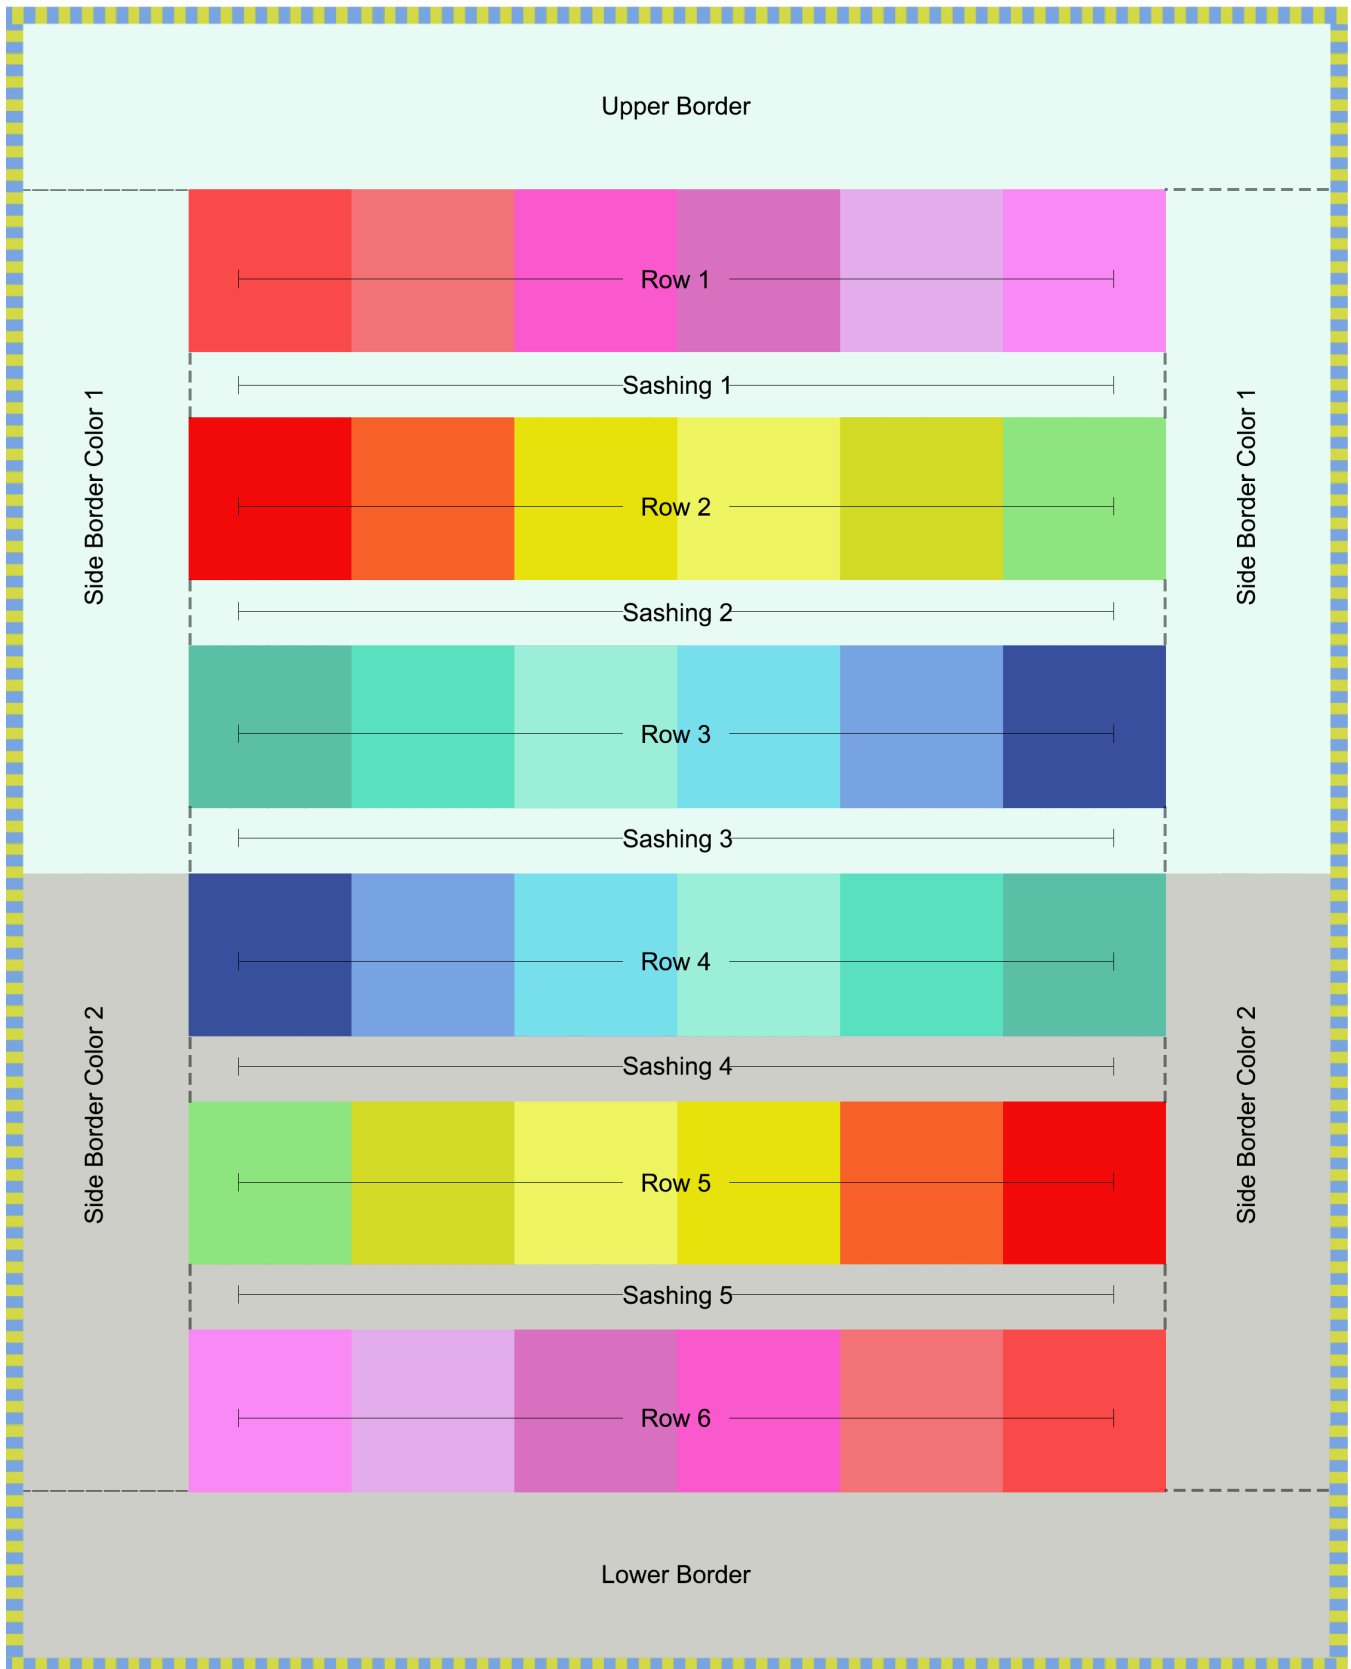

Upper Border Embroidery

1. Print the template that is included with the design collection for design #80168-22. Make two copies of the template (for a total of three templates) and cut them out, trimming close to the lines of the motif.
2. Arrange the three templates in a continuous line on the upper border using the diagram as a guide.
3. Using a fabric marker, mark the center of each design. Hoop the border and align the center of the design with the marked center on the fabric.
4. Stitch the three designs, rehooping as needed.
5. Print a template for design #80168-25. Position it in each upper corner and mark the center of the design. Note the orientation of the design is different in each corner.
6. Stitch one design in each corner, rehooping as needed.

Lower Border Embroidery

1. Print the template that is included with the design collection for design #80168-24. Make four copies of the template (for a total of five templates) and cut them out, trimming close to the lines of the motif.
2. Arrange the templates in a continuous line on the lower border, placing them edge-to-edge as shown in the diagram as a guide.
3. Using a fabric marker, mark the center of each design. Hoop the border and align the center of the design with the marked center on the fabric.
4. Stitch the designs, rehooping as needed. Note that the design may stitch off the edge of the quilt onto the batting and backing.
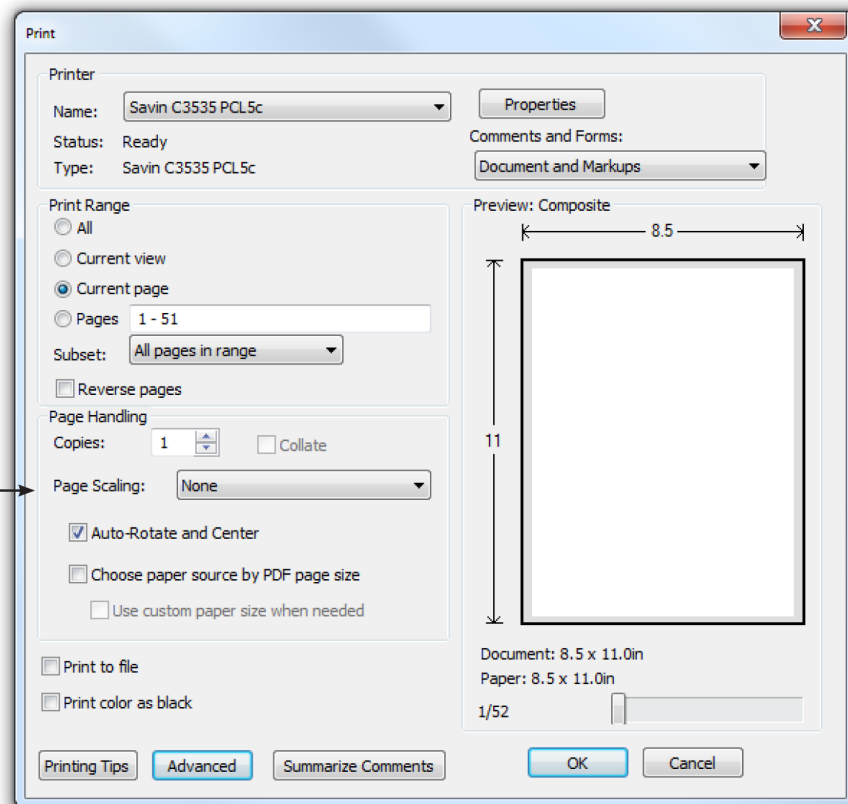

Binding

1. When stitching is complete, trim the edges of the batting even with the edges of the quilt top.
2. Fold the binding strips in half lengthwise and press.
3. Bind the side edges first by stitching the folded strip along the edge with the raw edges even.
4. Wrap the binding to the back and secure it by stitching in the ditch from the front of the quilt, or slip stitch to the back of the quilt.
5. Repeat for the opposite side.
6. To bind the upper and lower edges, first fold each end ¼" to the wrong side and topstitch about ⅛" from the edge; follow the steps above to complete the binding.

General Freestanding Applique Guidelines

Supplies:

Embroidery Thread:
- Use the same embroidery thread in the bobbin as the needle.

Needles:
- Use an Organ 80/12 Titanium needle for extended needle life.

Stabilizer:
- Use water-soluble stabilizer or film water-soluble stabilizer.

General Applique Instructions

1. Hoop two layers of OESD AquaMesh Stabilizer.
2. Attach the hoop to the machine and select the design of your choice.
3. Stitch the Placement Stitch. **Photo 1**
4. Place a piece of applique fabric over the Placement Stitch so that it is completely covered.
5. Stitch the Cut Line & Tackdown stitch.
6. Carefully cut away the excess applique fabric. **Photo 2**
7. Stitch the remainder of the design and repeat for any remaining pieces. **Photo 3**
8. Remove the hoop from the machine and the design from the hoop.
9. Trim excess stabilizer from the design.
10. Rinse away remaining stabilizer and allow it to dry face down to prevernt curling.

Handy Hints

Drying:
- Freestanding pieces look best when left to dry with right side down. This will minimize the tendency for a piece to curl. Be sure to flatten the piece out entirely and allow ample time to dry.

For 3D Applique Projects:
- Adhere 1 layer of OESD StabilStick TearAway to the back of applique fabrics with temporary adhesive spray **BEFORE** hooping or placing down for tackdown and cut in place. This gives fabric a more rigid structure.
- A pair of alligator clamps, tweezers, hemostats, stiletto or a tiny crochet hook can be extremely helpful when inserting the buttonettes into the eyelets. (See **Diagram 1** for explanation of "buttonette" and "eyelet".)
- Insert the tip of the tweezers, hemostats or crochet hook into the eyelet, grasp the buttonette and pull through the eyelet. Or a stiletto could be used to push the buttonette through the eyelet.

Diagram 1

Eyelet

Buttonette

Appliqué
Supplies

- ½ yard white fabric for deer head
- ¼ yard green fabric for plaque (or white if creating single-color version)
- OESD Fiber Form
- OESD Aqua Mesh
- Isacord threads (see thread chart for colors)
- 505 Temporary Adhesive Spray

Embroider the Pieces

- To create a multicolor deer, stitch one each of designs 1-9. To create a single-color deer, stitch one each of designs 10-18.
- For each design, follow the instructions below.
- Hoop two layers of Aqua Mesh stabilizer. Stitch Color 1, *Placement Line*. Remove hoop from machine but do not remove project from hoop. **PHOTO 01**
- Cut out a piece of fiber form for the appropriate design using the included pattern.
- Lightly spray the wrong side of the fiber form with adhesive spray. Place the fiber form onto the stabilizer, aligning it with the placement line. **PHOTO 02**
- Cut a piece of fabric 8" x 10". Lightly spray the wrong side of the fabric with temporary adhesive spray. Place over the fiber form and smooth onto stabilizer. **PHOTO 03**
- For deer antlers and plaque pieces only: Cut another piece of fabric 8" x 10". Lightly spray the wrong side of the fabric with temporary adhesive spray. Flip the hoop to the backside and smooth the fabric onto the stabilizer, covering the placement line. **PHOTO 04**
- Return hoop to machine and stitch Color 2, *Tackdown and Cut Line*. **PHOTO 05**
- Remove hoop from machine but do not remove project from hoop. Trim the fabric as close to the cut line as possible. **PHOTO 06**
- For deer antlers and plaque pieces only: Flip the hoop to the backside and trim the back fabric as closely as possible to the cut line. **PHOTO 07**
- Replace the hoop on the machine and stitch the remaining color changes, matching the bobbin for the outer satin color. **PHOTO 08**
- Rinse away the Aqua Mesh stabilizer and allow to dry. **PHOTO 09**
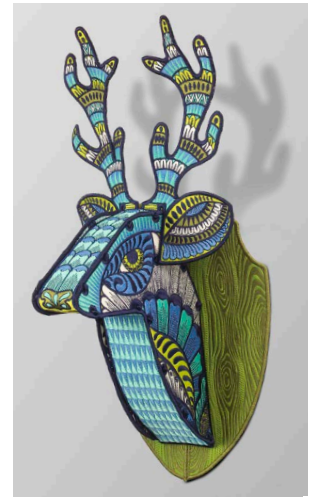

Assemble the Pieces

- Thread a sewing machine top and bottom with thread to match the outside color of the plaque. Butt the two straight-edge sides of the plaque together. Using a zig-zag stitch, join the two pieces along the straight edges. **PHOTOS 10 & 11**

Photo 01 | Photo 02 | Photo 03
Photo 04 | Photo 05 | Photo 06
Photo 07 | Photo 08 | Photo 09
Photo 10 | Photo 11

- Align the tab of the face side 1 with the left placement guide on the plaque. **PHOTO 12**
- Stitch in place by stitching just to the inside of the satin stitch edge of the tab, keeping the tab aligned with the placement guide. **PHOTO 13**
- Repeat for the face side 2. **PHOTO 14**
- Using alligator clamps, button the neck front to the lower buttons of the deer face. Button both sides. **PHOTO 15 & 16**
- Button the face front in place up to the nose, leaving the top portion open. **PHOTO 17**
- Button the neck back in place. **PHOTO 18**
- Slide the ear & antler side 1 in place at the top of the head. The backside of the antler should rest along the neck head piece. **PHOTO 19**
- Pull the button at the bottom of the ear into the side of the face. **PHOTO 20**
- Repeat for ear & antler side 2.
- Button the rest of the face front in place. **PHOTO 21**
- TIP: When head is assembled, shape the nose to fit the profile. Warm the nose piece slightly with steam or a hair dryer, then shape into place. Hold in place for a few seconds until the nose piece cools.
